SEVER WEATHER INFORMATION

It’s springtime in Oklahoma and weather can change suddenly and be quite severe! May is Oklahoma’s rainiest month, and most severe thunderstorms and tornadoes happen during this time. To learn more about how to be safe in severe weather situations, visit the National Oceanic and Atmospheric Association’s (NOAA) weather safety website. You can find a list of on-campus severe weather refuge locations on the Campus Safety website, as well as tips for staying safe. When storms move into the area, keep up by following the meteorologists on local T.V. stations from Oklahoma City and Tulsa. You can also stay informed with a weather radio, which only broadcasts weather reports.
